About me

I am an Angular and Backend ASP.NET Core professional, and I am specialize in designing and developing and deploying high performance web applications. I have a strong understanding of the tools and technologies essential for building robust applications. My core skills include expertise in Angular, ASP.NET Core, SQL Server Management, GitHub and PostgreSQL.

Technical Skills

- **Angular-**Proficient in developing dynamic, responsive single-page applications (SPAs)
- **C#-**Skilled in writing clean, efficient backend code with C# for building web applications.
- **SQL-**Experienced in designing and managing relational database and writing SQL queries.
- **TypeScript-**Hands-on expertise in building scalable applications.
- **CSS-**Capable of creating responsive, user-friendly web interfaces using modern CSS.
- **PG Admin-**Proficient in using PG Admin for PostgreSQL database management.

Education

Bachelor of Science in Computer Science (BSCS)
ILMA University – Karachi, Pakistan
Expected Graduation: 2027

Worked Modules

- Developed core accounting modules for Sales, Sales Return, Purchase, Purchase Return, and General Ledger. Created all key financial reports including Invoices, Vouchers, Trial Balance, Aging & Receivables Reports, with complete data reconciliation.

Projects

- Flour Management System, Doctor Management System, Construction Management

  Finance Management and others

- These are websites developed by me and my team members
